

PRESS RELEASE

Roosevelt County COVID-19
Roosevelt County, Montana
covid19taskforce@rooseveltcountry.org

November 9, 2021

FOR IMMEDIATE RELEASE

Contact:

Patty Presser, Director, Roosevelt County Health Department.
406-653-6227

CDC now recommends Pfizer-BioNTech COVID-19 pediatric formulation to children aged 5-11 years.

Vaccinating children will help protect them from getting COVID-19 and therefore reduce their risk of severe disease, hospitalization, or the development of long-term COVID-19 complications. Getting your children vaccinated can help protect them against COVID-19, reduce disruptions to in-person learning and other activities, and help curb community transmission.

For an appointment to get COVID vaccine for your 5-11 year old, please call Roosevelt County Health Department at (406) 653-6223. Vaccine clinics for this age group will begin 11/19/2021.

For all other COVID vaccination needs, including for people with weakened immune systems and booster doses, also call (406) 653-6223 for an appointment at one of the Health Department's clinics in Wolf Point or Culbertson.

Vaccination remains the #1 preventive action a person can take to prevent infection with COVID-19. As of 10/29/2021, 54% of eligible persons in Roosevelt County had received at least one dose of COVID vaccine.

For COVID testing, call for instructions:

Wolf Point IHS (406) 653-1641
Poplar IHS (406) 768-3491
Trinity Hospital (406) 653-6543
Poplar Hospital (406) 768-6120
Roosevelt Medical Center (406) 787-6412
